

Pramesh Singhavi

San Diego, CA | 619-206-1400 | prameshsinghavi02@gmail.com | prams2104.github.io

EDUCATION

BS Electrical Engineering, UCSD | 2022 - 2026 (Finishing a quarter early) | San Diego, CA

GPA: 3.72/4.00; **SAT:** Math 760, Verbal 640; **SAT Math II:** 780

AWARDS & HONORS

- **Best All-Rounder Award** (Top student across academics, sports, service & creativity), High School
- **Ranked 2nd** in graduating class; 8 A*s and 1 A in IGCSE
- **Best Navigator Award**, Singapore Armed Forces (for terrain analysis, route planning & navigation)
- **Vice-Captain**, Singapore U16 & U19 National Cricket Team (international tournaments)

PROFESSIONAL EXPERIENCE

Strategy Consultant Intern, Monitor Deloitte | Jun 2025 - Sep 2025 | Singapore

- Designed quantitative scoring framework to rank 500+ pharmaceutical laboratories across 8 criteria (regulatory compliance, technical capability, ownership structure, certifications) - systematically filtered to 14 high-potential partners using multi-criteria decision analysis
- Constructed structured database from fragmented regulatory and public sources, cleaning and consolidating data on laboratory capabilities, compliance status, and certifications to enable data-driven partner selection

Technology Consultant Intern, Ernst & Young | Jun 2024 - Sep 2024 | Singapore

- Performed risk assessment of Port Singapore Authority's IT infrastructure, modeling failure scenarios and calculating expected loss metrics across critical systems to prioritize cybersecurity investments
- Analyzed control frameworks across multiple enterprise systems, producing risk-ranked recommendations with quantified probability and impact estimates for executive decision-making

National Serviceman, Singapore Armed Forces | Jul 2020 - May 2022 | Singapore

- Led 30-person platoon in high-pressure operations requiring real-time optimization of resource allocation, route planning, and tactical decision-making under uncertainty and time constraints

PROJECTS

OpsPilot - Transaction Reconciliation & Anomaly Detection System

- Built automated reconciliation system using dual validation strategies (exact matching + statistical anomaly detection) to identify transaction mismatches and missing entries across multiple ledger formats
- Architected production-ready validation framework with FastAPI/SQLAlchemy supporting extensible business rules and real-time processing

Sim-to-Real Robot Navigation with Reinforcement Learning

- Led a 5-person team where I systematically evaluated RL policy across 10+ simulated environments in Unreal Engine and validated on physical PiCar - measured sim-to-real transfer gap and quantified performance degradation under environmental variation

SKILLS: Python (Pandas/NumPy), C++, R, MATLAB, Regression analysis, Statistical Modelling, Mathematical Modelling

INTERESTS: Poker, Running, Soccer, Creative Writing, Cooking, Reading, President of UCSD cricket club

LANGUAGES: English, Hindi
